To find the winners, match the last digit of each team's score with the numbers on the grid. For instance, if the AFC team scores 23 points and the NFC team scores 14 at the end of a particular quarter, locate 3 (AFC) and 4 (NFC) on the grid for that quarter. The square where these numbers intersect wins the prize for that quarter.

- 1st Quarter = \$1,000 Winner
- 2nd Quarter = \$1,000 Winner
- 3rd Quarter = \$1,000 Winner
- Final Score* = \$2,000 Winner

*Note: If the game goes into overtime, we will be using the actual final score of the game (not the score at the end of the 4th quarter).
